Google Cloud Platform
Fundamentals: Core
Infrastructure

Computing, Storage and
Security with Google Cloud
Platform

Configuration Management on
Google Cloud Platform

Designing Highly Scalable Web
Apps on Google Cloud Platform

07/03/2017

Vasileios Koukoutsas

has successfully completed the online, non-credit Specialization

Google Cloud Platform for Systems Operations Professionals

In this specialization, learners used Google Cloud Platform to design, create, or migrate application environments and infrastructure. The specialization focused on hands-on labs performed on various products of Google Cloud Platform, including App Engine, Cloud Datastore, Container Engine, Compute Engine, BigQuery, and Machine Learning.
